Collected Knowledge & Wisdom on

Bored API

Provides:

This API provides random activities for you to do while you're bored and details about the activity, such as price, accessibility, number of participants needed, etc.

Key Provisioning: **Pain factor** (*0=ezpz...5=nightmare*): _0_

- None needed! All you need is the url.

Quotas:

- None! No quotas and no access limits!

The Good:

- Super simple. You can't get easier than this. Fields are:
    - Activity
    - Accessibility
    - Type
    - Participants
    - Price
    - Key
- Very clear and in-depth documentation
- Easy to customize search (eg. specific price, accessibility range, etc.)
- Free and open source
- Can specify parameters for the returned activity

The Bad:

- Not a very helpful API unless you are actually bored and have nothing to do

The Ugly:

- All you can do is parse some texts and numbers… not very interesting
